

Senior Scientist I/II– Immuno Oncology

We currently have an opening for a Senior Scientist in our Immuno-oncology group in our Discovery Services area. We are looking for someone with:

- Experience designing and conducting *in vitro*, *in vivo*, and *ex vivo* experiments in the area of immune biology and disease.
- Experience in cancer biology, and experience using multiple types of *in vivo* cancer models to discover and develop novel cancer therapeutics would also be advantageous
- Proficiency with multi-color flow cytometry and mechanistic studies of immune regulation
- Publication record in immunology or immuno-oncology
- Detail-oriented, with excellent organizational and record-keeping skills

Experience:

- PhD or equivalent, in immunology or related biological sciences with 2-5+ years of industry or academic experience.
- Experience designing and conducting *in vitro*, *in vivo*, and *ex vivo* experiments in the area of immune biology and disease.
- Experience in cancer biology, and experience using multiple types of *in vivo* cancer models to discover and develop novel cancer therapeutics would also be advantageous
- Proficiency with multi-color flow cytometry and mechanistic studies of immune regulation
- Publication record in immunology or immuno-oncology
- Detail-oriented, with excellent organizational and record-keeping skills
