

Immunotoxicology Study Director / Principal Investigator/Contributing Scientist II

- ◆ May serve as a Study Director for immunotoxicology studies, as described in the GLPs. Has overall responsibility for the technical conduct of a study as well as for the interpretation, analysis, documentation, and reporting of results.
- ◆ Serves as a Principal Investigator/Contributing Scientist on Toxicology studies that include an immunotoxicology component. Has overall responsibility for the technical conduct of the immunotoxicology portion of the study as well as for the interpretation, analysis, documentation, and reporting of results into a contributor report.
- ◆ Act as the primary scientific contact for any client queries on immunotoxicology-related matters.
- ◆ May plan, design, and lead teams to conduct complex method development/feasibility studies to generate high quality scientific results on behalf of Covance clients and play a key role in developing new strategies, techniques, and instrumentation for new ventures and critical issues in immunotoxicology.

Education:

PhD in immunotoxicology, toxicology, immunology, or equivalent degree or experience. Expected that the incumbent will strive towards board certification in toxicology.

Experience:

- ◆ Two to five years of related experience. Relevant experience may be substituted for education.
- ◆ Highly skilled in conducting research, data interpretation, and writing reports.
- ◆ Proven track record of immunotoxicology principles and method development.
- ◆ Experience and knowledge of relevant instrumentation (e.g. – flow cytometer).
- ◆ Highly skilled in performing scientific presentation and preparing scientific publications
- ◆ Knowledge of laboratory automation software, system software, and Microsoft applications.
